INDEX

Manufacturing manuals: index

Start with **STANDARD_PROCEDURES.md** (PCB ordering, SMT/THT assembly, soldering, programming, 3D printing, laser cutting, QA, packaging, compliance, troubleshooting) and the templates. Each product has a `MANUFACTURING_MANUAL.md` with its bill of materials, build steps, calibration, end-of-line test and limits.

Honest status: nothing in this repository has been built, assembled or tested as hardware. 'Order-ready' means the automatic checks pass (KiCad DRC 0 errors, schematic equals layout, every part has a verified LCSC number, Gerber/BOM/CPL consistent): it does **not** mean an engineer has reviewed the layout. Treat the first batch as a prototype run.
